### Centers of Excellence in Primary Care Education Compendium of Five Case Studies: Lessons for Interprofessional Teamwork in Education and Learning Environments, 2011-2016

U.S. Department of Veterans Affairs, Veterans Health Administration and the Office of Academic Affiliations recognized the need to rapidly transform VA's clinical education strategies and workplace learning environment to support the preparation of the nation's future health professionals (interns, trainees, residents, fellows) to practice in higher quality, safer and more efficient team-based care and collaborative practice environments.

VA's five Centers of Excellence of Primary Care Education (CoEPCE) in collaboration with academic affiliate partners, each serve as incubators for teaching and learning in Interprofessional Academic Patient Aligned Care Teams (iPACTs). This compendium of five case studies written by primary care clinical professionals, tells stories rarely published in traditional academic venues. This volume is designed to illustrate five unique strategies by which interprofessional team-based education can occur in clinical settings. The case studies will provide the reader with information and resources to support the implementation of complex interprofessional curricula and practice in their own primary care or other clinical setting.

This resource may apply to professionals working in clinical medicine environments, with special focus on patient-centered medical care for high risk patients. Physician residents, nurse practitioner residents, interns, trainees, and other professionals at Veterans hospitals and other medical facilities may be interested in this resource. Medical school professors and students pursuing research for excellence in primary care by enhancing teamwork skills for the medical professional may find this case study compendium helpful toward team-based care and collaborative practice environments. At the undergraduate level, students enrolled in Pre-Med classes may find useful guidance within this resource in the areas covered relating to assessments, evaluations, and team building skills for shared patient care to monitor chronic diseases, and more.

### Out of the Crucible: How the US Military Transformed Combat Casualty Care in Iraq and Afghanistan

**Now available in paperback format! Limited quantities. Hardcover format sold out within four weeks. Get your printed copy today!**

Primarily written by the military providers who developed or championed the innovations in each field, this 44-chapter book documents the key advances in combat medical

and surgical care that were developed during America's wars in Iraq and Afghanistan and provides stories and first-person essays of service members who benefited from them. In addition, the book not only describes what advances were developed, but how they were brought about. It is one of the most extraordinary tales in the history of American medicine.

Anyone interested in improving American healthcare, including American citizens, Congressional policymakers, pre-health professions students, nursing and medical students, civilian health care professionals and others will be informed and inspired by this depiction of how America's military health professionals rapidly improved their capacity to provide lifesaving care to injured military service men and women in combat zones and other dangerous environments. Moreover, because most of these innovations

are being rapidly spread to civilian trauma centers and EMS agencies, the book may also appeal to civilian medical providers and first responders faced with similar challenges in their daily work.

## A Legacy of Lessons Learned: Landstuhl Regional Medical Center During Wartime, 2001-2014

From a community hospital providing routine healthcare delivery to personnel stationed in Europe and their families before 9/11, Landstuhl Regional Medical Center (LRMC) transitioned into a Level 1, triservice, integrated trauma center. It provided lifesaving care to tens of thousands of evacuated service members, in addition to handling all the associated needs of these patients, from payroll assistance to chaplain services, service and unit liaison support, veteran service organization support, as well as delivering ongoing healthcare to beneficiaries across Europe, Africa, and Asia.

The goal of this text is to share the lessons learned by Landstuhl Regional Medical Center staff in converting from a peacetime to wartime footing, serving as a guide for US military hospitals in similar situations in the future. The innovations and solutions planned and implemented so successfully by LRMC staff will assist future military medical and line leaders in maintaining the highest quality of healthcare services for future generations. Military physicians, surgeons, and medical/healthcare professional teams, active duty and veteran military members that may have spent time recovering at Landstuhl, and civilian

emergency medicine/allied health professionals may be interested in this text. Additionally, students pursuing pre-med or emergency medicine coursework or research for acute care may also find this medical reference helpful.

## Regulatory Information

### USDA Animal Care: Animal Welfare Act and Animal Welfare Regulations

Also known as the “Blue Book”, this publication serves to improve compliance among licensees and registrants to enhance the consistency of inspections by USDA field inspectors. This *Blue Book* consolidates into one source the AWA (Animal Welfare Act) and the applicable regulations and standards. These regulations insure that animals intended for use in research facilities, or for

exhibition purposes, or for use as pets are provided humane care and treatment. It also protects the owners of animals from the theft of their animals by preventing the sale or use of animals which have been stolen. Lastly, it assures humane treatment of animals during transportation in commerce. Field inspectors, animal research and exhibition facility managers, animal and pet owners, animal humane society activists, law school students pursuing research in animal law or animal health law, may be most interested in these regulations and standards in pet and animal care.

## Cyber Law

### Prospects for the Rule of Law in Cyberspace

The application of international law and legal principles in cyberspace is a topic that has caused confusion, doubt, and interminable discussions between lawyers since the earliest days of the internationalization of the Internet. The still unresolved debate over whether cyberspace constitutes a fundamentally new domain that requires fundamentally new laws to govern it reveals basic ideological divides. On the one hand, the Euro-Atlantic community

led by the United States believes, in broad terms, that activities in cyberspace require no new legislation, and existing legal obligations are sufficient. On the other, a large number of other states led by Russia and China believe that new international legal instruments are essential in order to govern information security overall, including those expressed through the evolving domain of cyberspace. Russia in particular argues that the challenges presented by cyberspace are too urgent to wait for customary law to develop as it has done in other domains; instead, urgent action is needed.

Attorneys within the information security arena and cyber professionals may be interested in this text. Undergraduate and graduate students studying national and global security with an emphasis on information cyber security coursework may be interested in this text for additional research for classes, such as: Ethics, law and policy, network security, IT Security Defense Countermeasures; Cyber Investigation, Cybersecurity Law and Policy, Introduction to Cyber Conflict, Cyber Law, Cyber Defense Strategies, Information Sharing and Safeguarding, Globalization and Threats and International Security, Intelligence and Strategic Analysis, Security and Civil Liberties, Methods of Strategic Analysis, and more.

## Harold Brown: Offsetting the Soviet Military Challenge, 1977-1981

Author Edward Keefer chronicles and analyzes the tenure of Secretary of Defense Harold Brown, who worked to counter the Soviet Union's growing military strength during the administration of President Jimmy Carter. Flush with cash from oil and gas development, the Soviets came closest to matching the United States in strategic power than at any other point in the Cold War, threatening to make the U.S. land-based missile force vulnerable to a first strike. By most reckonings the Kremlin also surpassed the West in conventional arms and

forces in Central Europe, creating a direct threat to NATO. In response, Brown, a nuclear physicist, advocated for the development of more technologically advanced weapon systems to offset the Soviet military advantage, but faced Carter's efforts to reign in the defense budget. Eventually the secretary, backed by the Joint Chiefs of Staff (JCS), the national security adviser, and key members of Congress, persuaded a reluctant Carter to increase defense spending for the last two years of his term. As a result weapons development such as stealth technology, precision-guided bombs, and cruise missiles went forward. These initiatives and more provided a head start for the acclaimed Ronald Reagan revolution in defense. As the author points out, there was more continuity than contrast in defense policy between Carter and Reagan.

Political strategists, political scientists, international relations scholars, foreign policy advocates, historians, and political economists may be interested in this comprehensive historical reference for United States defense and foreign policy under the Jimmy Carter administration. High school students pursuing research for essays and term papers for Government, Modern World History, and United States History may be interested in this resource. ## Debates on the Federal Judiciary: A Documentary History, Volume 3, 1939-2005

The concluding volume of the series covers debates concerning structural changes to the federal courts, including the creation of the U.S. magistrate and U.S. bankruptcy judge positions, and alterations to the federal appellate system, including the division of the Fifth Circuit, the creation of the Federal Circuit, and proposals for a national court of appeals. A section on criminal

justice reform recounts debates over access to counsel for indigent defendants, detention before trial, habeas corpus, and the creation of the U.S. Sentencing Commission. The volume also covers proposed civil justice initiatives regarding diversity jurisdiction, class actions, case management, alternative dispute resolution, and the creation of the Judicial Panel on Multidistrict Litigation, and concludes with discussions on the discipline of federal judges, including proposals for a nonimpeachment method for judicial removal. Attorneys, judges, (especially Federal court personnel) may be interested in this historical reference. Law school librarians, law school students, and professors may also be interested in this historical legal reference for courses relating to American legal history or as a reference to Introduction to Law and the Legal system courses.

### Veteran Hiring in the Civil Service: Practices and Perceptions

This report describes the laws and regulations for hiring veterans into the civil service. It explains that the laws and regulations regarding the preferences in hiring that can or must be given to veterans and certain family members are extremely complicated. It includes survey data of perceptions by employees regarding both violations of veterans' preference rights and inappropriate favoritism of veterans. Furthermore, it explains the history behind—and implementation of—a law

that was designed to ensure that the hiring of recently retired service members as civilian employees of the Department of Defense is based on merit and not favoritism. Federal employees, their supervisors, agency management, union personnel, especially Human Capital officers and employees across the U.S. Federal Government may be interested in this report. Additionally, members of Congress, and Federal managers within the Office of Management and Budget, and Office of Personnel Management employees responsible for policy making authority may find this guide helpful as a reference with human resources and civil service matters. Additionally, students pursuing research for courses within these fields, especially public administration, human resources, employment law, organizational development, and industrial-organizational psychology may find this primary source document that deals with civil service issues helpful for assignments.

### Women in the Federal Government: Ambitions and Achievements

This report assesses the treatment and advancement of women in the Federal Government. Merit Systems Protection Board (MSPB) finds that much has changed for the better since its 1992 report "An Question of Equity: Women and the Glass Ceiling in the Federal Government." For example, women hold an increased proportion of positions in the Senior Executive Service, and

fewer women report that they are subjected to discrimination or stereotypes. However, the vision of a workforce in which women are fully represented and utilized has not been wholly achieved. Federal agencies may need to reexamine their approaches to recruitment, work assignment, or leadership development to address contemporary challenges such as continuing occupational differences between women and men. The report outlines recommendations that Federal agencies, managers, and employees can take to promote workplace fairness and the full utilization of all employees.

Federal employees, their supervisors, agency management, union personnel, especially Human Capital officers and employees across the U.S. Federal Government may be interested in this report. Additionally, members of Congress, and Federal managers within the Office of Management and Budget, and Office of Personnel Management employees responsible for policy making authority may find this guide helpful as a reference with human resources and civil service matters.
